Coding & Solution

Date	01 July 2026
Team ID	
Project Name	Smart Lender
Maximum Marks	5Marks

Solution Summary

Field	Details
Repository Link / URL	https://github.com/Hasini160817/AIML-Track-Project-Smart-Lender.git
Programming Language(s)	**Python**
Framework	**Flask**
Machine Learning Algorithm	**Random Forest Classifier**
Dataset	**Loan Prediction Dataset**
Development Tools	**Google Colab , Visual Studio Code**
Database	**None**
Output	**Loan Approval Prediction (Approved/Rejected)**

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:

The **Smart Lender – Loan Approval Prediction** application is developed using **Python** and **Flask**. A **Random Forest Classifier** model is used for prediction. The code is modular, well-commented, and follows best practices. All necessary files are included to run the application successfully. The project is maintained in a **GitHub** repository.
