

Demonstration of Proposed Features

Date	06 July 2026
Team ID	
Project Name	Smart Lender
Maximum Marks	1Mark

Demonstration of Proposed Features:

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	User Input Form	Users can enter loan details such as Gender, Married, Dependents, Income, Loan Amount, Credit History, etc.	Implemented	Yes	Input form built using HTML (input.html) and Flask routes.
2	ML Model Prediction	Random Forest Classifier predicts whether the loan should be Approved or Rejected.	Implemented	Yes	Model loaded from rdf.pkl and used for prediction.
3	Prediction Result Page	Displays the prediction result as Loan Approved or Loan Rejected.	Implemented	Yes	Output displayed on output.html page.
4	Navigation Links	Users can navigate between Home Page, Input Page, and Result Page easily.	Implemented	Yes	Navigation implemented using HTML links.
5	Responsive UI	The web pages are simple, clean, and responsive for easy user experience.	Partial	Yes	Basic responsive design implemented.
6	Deployment on Render	The application is deployed on Render and accessible online.	Implemented	Yes	Live at https://smart-lender-2z2i.onrender.com

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	5
Total Features Demonstrated	6
Overall Implementation Rate (%)	83.33%
